#### Data & Information

Environmental management policy

Avast is committed to managing its environmental impacts in a responsible way. The Company takes measures to identify, assess and address the risks and opportunities arising from its activities

The Company regularly monitors its environmental performance to support the efficient use of energy, and to seek to reduce pollution, emissions and waste generated by the activities of the business. Metrics are managed via established internal systematic processes and verified by an independent third party to ensure accuracy and support continual improvement. Avast makes its environmental performance metrics publicly available

In accordance with Avast Supplier Guidelines, we expect our suppliers, service providers and contractors to commit to responsible consideration of the environment in their business and workplaces. Our supply chain must comply with all applicable laws and regulations prohibiting or restricting specific substances, emissions, and pollution

Avast promotes responsible environmental practices among all employees and encourage voluntary environmental efforts

## 2. GHG emission

CDP,
